PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in Data Structures Algorithms and full-stack development using React and Django. Aspiring Software Engineer experienced in building scalable, secure, and high-performance applications with RESTful APIs and efficient backend design. National-level hackathon winner in the FinTech domain.

EDUCATION

Vignan Institute of Technology and Science <i>Bachelor of Technology in Computer Science and Engineering – CGPA: 9.38</i>	Hyderabad, Telangana 2023 – 2027 (Expected)
Telangana State Model Junior College <i>Intermediate (MPC) – Academic Percentage: 95.9%</i>	Yadadri Bhuvanagiri, Telangana 2021 – 2023

ACHIEVEMENTS

First Prize – VHack 2.0 National Level Hackathon <i>Cybersecurity & FinTech Domain — Vignan Institute of Technology and Science</i>	Feb 2026
- Led a 3-member team to architect and develop an AI-driven financial anomaly detection platform within a 24-hour national hackathon - Integrated AI-based analytics and real-time risk monitoring mechanisms to enhance fraud detection accuracy and system reliability	

EXPERIENCE

Frontend Web Development Intern <i>IBM SkillsBuild (Remote)</i>	Aug 2025 – Sep 2025
- Developed responsive and accessible web interfaces improving cross-device compatibility and reducing UI rendering issues - Collaborated in Agile-based development cycles including feature implementation, debugging, and structured peer reviews - Optimized frontend performance through structured debugging and cross-browser testing, enhancing overall user experience	

PROJECTS

AI Skill Intelligence Platform <i>React + Vite, Django, OAuth, REST APIs</i>	
- Architected a full-stack AI-powered assessment platform using React and Django for intelligent skill evaluation and recommendation generation - Implemented OAuth authentication and REST APIs enabling secure user management and scalable backend workflows - Designed scalable backend architecture with secure authentication and optimized API endpoints for efficient data processing	
Online EAMCET Examination Portal <i>PHP, MySQL, JavaScript</i> Live GitHub	
- Built secure online examination system supporting timed assessments, question randomization, and automated evaluation - Developed administrative dashboard with tab-switch monitoring to reduce malpractice during examinations - Integrated database-driven result processing ensuring efficient data handling and accurate performance analytics	
Portfolio Website <i>HTML, CSS, JavaScript</i> Live GitHub	
- Designed and developed a responsive personal portfolio website showcasing software projects, technical skills, and achievements using modern web technologies. - Implemented interactive UI components and smooth navigation with JavaScript, improving user engagement and interface usability. - Integrated project links, contact forms, and social media features to enhance accessibility, user interaction, and connectivity.	

SKILLS

Technical Skills	Non-Technical Skills
- Languages: C, C++, Java, Python - Frontend: React, JavaScript, HTML5, CSS3 - Backend: PHP, Flask, Node.js, REST APIs - Databases: MySQL, SQLite, SQL - Tools: Git, GitHub, Docker, VS Code - Core CS: DSA, OOPS, DBMS, OS, CN	- Leadership & Team Collaboration - Problem Solving & Critical Thinking - Communication & Presentation - Time Management & Adaptability - Project Coordination - Analytical Thinking

CERTIFICATIONS

Power BI Virtual Internship – NSDC Web Development Fundamentals – IBM SkillsBuild Programming Essentials in C – Cisco	Java Skill Certification – HackerRank Responsive Web Design – freeCodeCamp Python Programming – Udemy
